

## Library Calculator – Checkout Responsibilities

Your son/daughter will be issued a graphing calculator to be used in their 8<sup>th</sup> grade Math class, if a personal **graphing** calculator is not owned. Since calculator use is essential for the testing, the graphing calculator is being issued in a similar manner to a textbook.

It is the student's responsibility to take care of the calculator and replace batteries as needed. Each calculator will have working batteries or a charge cord when issued. **If the calculator is lost, stolen or damaged in any way it is the student and/or parent's responsibility to pay for it.** Replacement cost for the TI-nSpire is \$130.00, TI-84 Plus is \$130.00, and the VICTOR 700 is \$10.00.

Since the KCJH calculators are used on **ALL** standardized tests, it is your child's responsibility to return the calculator to the library as needed to avoid disciplinary action as determined by administration. If you choose to purchase a calculator for your child, the calculator that will be used for 8<sup>th</sup> grade math will be the TI-84 Plus. Algebra I students will be using the TI-nSpire. This is the calculator your child will be given during testing. **Please note that your child may NOT use his/her own calculator during state testing.**

**\*\*In the past, we have had problems with calculators being returned without the barcode. Each calculator has a unique internal code that can be used to find out specific information about the item. Removing a bar code will be considered as damage, and the cost of which will be added to the student's account (\$2.00 per barcode) for the bar code replacement. \*\*** The replacement cost of the following calculator parts is as follows: Slide Cover Replacement: \$4.95; Battery Cover Replacement: \$1.95; Charge Cord: \$10.00.

Please sign and return this paper to the library to receive a calculator.
